

Trilo **T25** Vacuum container

TRILO T25 vacuum container

The TRILO T25 vacuum container is ideal for collecting litter, leaves and hedge trimmings. The container can be used on its own or can be placed on a truck. The T25 has an improved capacity due to a differently positioned turbine. This guarantees an excellent filling degree of the container.

The 6 blade fan has been reinforced for extremely strong suction power and long life. Because of the high quality sound dampening package and quiet fan the noise level of the machine is only max 87 dB(A) at the operators workplace, which makes it also suitable for urban areas.

The radiographic or joystick controls, digital screen for fuel and water levels, water filling point at working height and programmable LED flash lights make the T25 a user friendly and flexible machine. The 500 litre plastic water tank (no corrosion) and 125 litre fuel tank make it possible to continue to work longer. The electrical installation is completely revised and daily maintenance is easy because of easy to reach access points. The T25 is available with various low emission engines.

Features:

- High capacity
- Long lasting
- Quiet
- Maintenance friendly
- Reliable

Technical Specifications

Centrifugal pump	: ø 960 mm – 6 blades
Drive	: 4-Cylinder Diesel engine
Power	: 65 HP
Max. engine RPM	: 3000 RPM
Measurements	: 6,68 x 2,51 x 2,55 m
Loading capacity	: 25 m ³
Weight	: 4800 kg
Max. weight when filled	: 15000 kg
Suction hose	: ø 350 mm x 4 m
Max. sound power	: 102 dB(A) ISO 3744
Max. noise level at workplace	: 87 dB(A)
Hydraulic pressure	: 200 bar

Specifications subject to change without prior notice or obligation.
